coinvote.cc

The #1 tokens listing & voting platform

Pioneer in this concept, we started in May 2021 as a project for the cryptocurrency community.

Since then, we have become the world's most-loved and trusted cryptocurrency website to find or promote DeFi-related **EARLY** projects .

Coinvote is the best place to run advertising relevant to a growing crypto base.

Targeted, engaged audience

Services **aimed at active members and investors**, they return multiple times daily to vote and find new projects. Our social network voting system attracts many active visitors

(Trending section)

Large, reliable visibility

Unlike emerging competitors **who buy traffic to boost sites like Similarweb, Alexa**, and saturate their site with advertising (so nobody really uses it), **we guarantee a real ROI.**

Superior performance over benchmarks

Across various ad properties, our clickthrough performance is better than normal industry benchmarks. **We offer unbeatable rates.**

Our traffic is the most engaged across all crypto sites

Our company

INSIGHTS

Who we are

MISSION

Provides crypto asset investors with a reliable and pioneering platform in discovering new projects and crypto-currencies before listing on major crypto exchange platforms.

Gives an opportunity for crypto-currency and blockchain project creators to increase their visibility to investors.

VISION

Expand its domain in cryptocurrencies by offering features to its users in many blockchain and then offer a platform for NFTs.

To become a major player in discovering ambitious blockchain projects and helping creators.

Services

LISTING

Coinvote reviews and accepts or rejects any listing request made on the site. The process is free, but we may refuse a request that is not compliant or may be a scam.

ADVERTISING

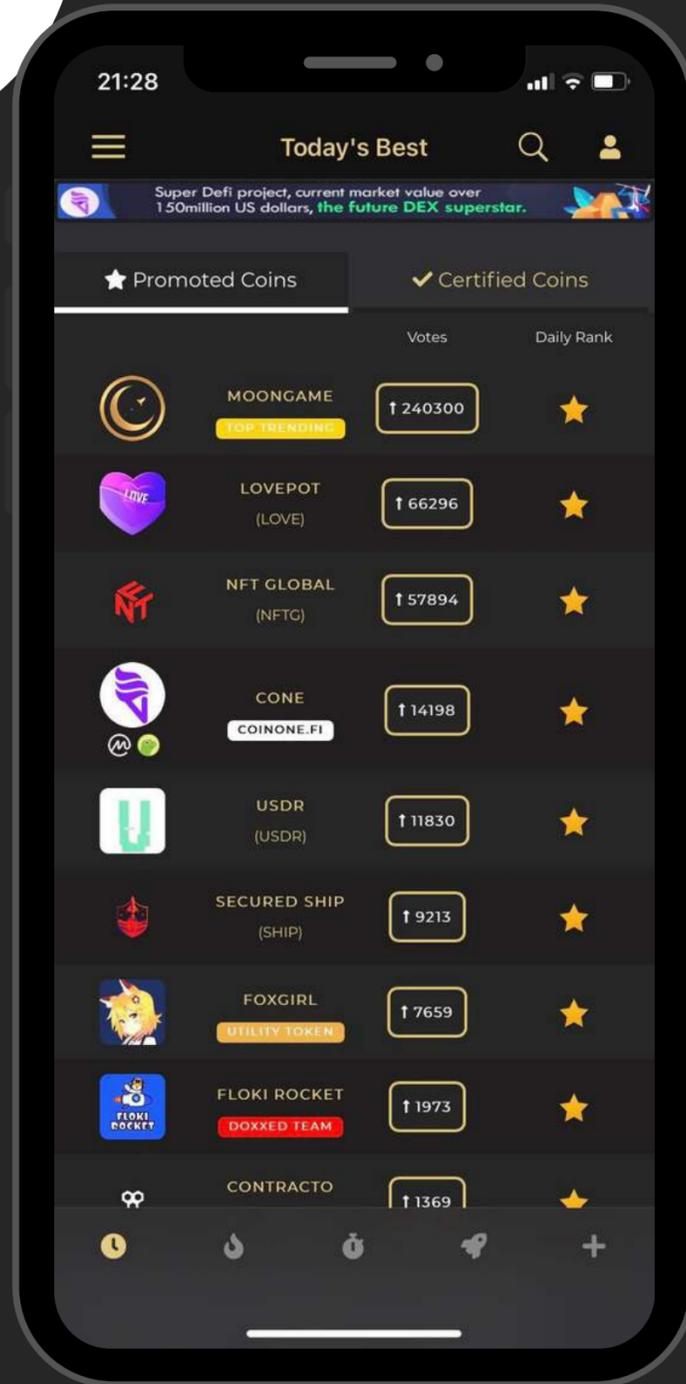

We offer advertising services to clients and companies that highlight projects on the first page of the site.

RANKING

All referenced cryptocurrencies are ranked by votes. The votes are reset every day and it is up to the project's community to vote for it to be on the first page.

PAGE

Each listed token has its own page, the user who listed it can update it, add news, social networks etc.. On our side we update the prices, regulate the comments and reports.

Mobile application available on iOS and Android
